Technical Projects

GymWhisper - Voice-Driven Workout Tracker | *React, JavaScript, Gemini API* June 2025 – August 2025

- Collaborated in a 4-person team to develop a voice-driven workout tracker integrating **Google Gemini API** and the **Web Speech API** to convert natural-language workout entries into structured data
- Built and refined key parts of the **React frontend**, implementing responsive UI components and user interactions across features such as **live transcription, workout history, and dark mode**
- Coordinated team execution by organizing task lists, tracking deadlines, and supporting asynchronous development throughout an **Agile/Scrum-inspired workflow**
- Conducted usability testing with **7 participants**, achieving **100% reported accuracy** on workout recognition and UI ratings of **4–5/5**

Personal Portfolio Website | *React, JavaScript, Three.js, GSAP, Tailwind CSS* July 2026 – Present

- Developed a **responsive** portfolio using **React**, **JavaScript**, and **Tailwind CSS**, featuring reusable UI components, interactive project showcases, and seamless navigation across devices, with deployment on **Vercel**
- Integrated **Three.js** through **React Three Fiber** to render an interactive 3D laptop, using **Zustand** to synchronize screen imagery with user-selected content
- Implemented **GSAP ScrollTrigger** animations and a pinned video-mask reveal, plus an **Embla** carousel with synchronized project selection and navigation controls
